Leah Alexander Is Called a Hazard Which Van Baalen Overlooked.

arranged around the walls of the old

Los Angeles, Cal., May 26.-That an ffinity is a hazard and that the courtng of an affinity by a married man is a dangerous undertaking, is the basis of a law suit that has brought beautiful Leah Alexander, slayer of J. D. Van Baalen, of San Francisco, into the limeight again.

have been a "hazard" that may pre-vent the widow of Van Baalen from col-lecting his life insurance, is now in Los

not engaged in any dangerous or hazardous occupation.

Thus the court must decide this problem, "Is an affinity a hazard."

The love letters Van Baalen wrote
to his affinity will be the chief witnesses for the Insurance company.
These letters will prove, according to
the girl herself, that Van Baalen declared he wanted to marry her and the
contention of the insurance company is
that such a declaration made by a married man was shour as perilous a plan
as a human mind could conceive.

Lean Alexander, who had been living
unfeily with her mather at 1015 Lake
Shore arenue since the ending of her
love tragedy, is declared to be a "hazardous undertaking," and the love
journey which the two took to Coba
last May is considered in the light of a
dangerous voyage by the London Guarantee and Accident company, in answer
to Mrs. Antoinette Van Baulen some to
collect her bushand's pelicy.

Affinity New Heartmend,

The fact that Van Baulen forgot to
mention his affinity when he took out
an accident policy, is believed by the
company to be sufficient grounds to
break the policy. That he swore he had
no plans in view which might result in
disaster, when his affair with Leah Alexander had already begun, is declared
by them to prove that Van Baulen for

Birds Conserve Public Health

Their Value to Farmers Long Ago Recognized, but New Relation to Public Health Only Recently Discovered; Kill Off Mosquitoes,

W ASHINGTON, It C., May 25.—
We have light is shed on the activities of birds as conservers of the public health in a communication to the public health in a communication to the National Geographic society from Henry W. Henshaw, chief of the biological survey. The survey for a considerated by the period has been studying the foods of thirds by examining the foods of thirds by examining the stomach of a specimens killed for stlentific purposes.

The value of birds to the farmer in plain enough, but we do not usually think of birds as having any direct relation to the public health, writes Mr. Henshaw. To prove that they do, however, it is only recessary to state that 500 mosquitoos have been found in the stomach of a single algabiance and that many shore birds greedly seconr mosquito have been found, and that many shore birds greedly seconr mosquito have been found, and that many shore birds greedly seconr mosquito have been found, and that many shore birds greedly seconr mosquito have been found, and that many shore birds greedly seconr mosquito have been found, and that many shore birds greedly seconr mosquito have been found, and that many shore birds greedly seconr mosquito have been found, and that many shore birds greedly seconr mosquito have been found, and that the capture of their own, the destruction of poxious redents.

\*\*May Reduce Crop Damage\*\*

Notwithstanding the fact that the and that the crops are greater, the cost of foodstuffs continually mounts updated to many millions each year. If any part of this loss can be greened to many millions each year. If any part of this loss can be protect from. This can be done by fur-

mosquito have been found, and that mosquito have been found, and that many shore birds preschily sevour mosquito larvae. As mosquitoes are known to carry the germs of such serious diseases as typhoid, malaria and dengue fever, it is evident that by destroying a first benefit on man. It may be added that not infrequently ticks are added that not infrequently ticks are eaten by birds, and that the tick which is responsible for the spread of Texas fever among cattle has been frequently found in the stomach of a bolichies.

'The considering the many kinds of birds in the United States to larger than ever before, and that the rore are presented it will be so much prevented it will be so much clear gain. Since hirds perform such invaluable service, every efforts should be made to protect them. This can be done by furnishing, the hordes of insects that if unchecked would devour every green thing. To accomplish this hask successfully, the members of the force must be voiced them. This can be done by furnishing. To accomplish this hask successfully, the members of the force must be voiced the more or less time on the ground, we find more birds are fittled for terrestrial service than for any other. Our largest bird family, the approvers, is chiefly terrestrial, it is ably aided in its seach for insects by the thrushes, wrens, certain of the warbles and many other birds. So many insects hurrow into trees that a highly appendixed class of birds—the wood-insects hurrow into trees that a highly appendixed class of birds—the wood-insects hurrow into trees that a highly perfects.

"Windjammers" Have Plenty Of Work Army Musicians Drill, Hike and Toot, Besides Having Much Extra Work to

Military musicians are supposed to have the softest bertins in the United States army. On the contrary they are as busy as stenographers taking Chinese dictation all day long. They have all the routine of soldier life plus their work of making music for the hinkly soldiers in camp, on the march and in harracks.

The work of the 6th infantry band at camp Cotton is a good example of the life of an army "windpammen," army slaing for bandsman. They have the regular drills and hikes that the other soldiers of the 5th must take part in, they have a rehearmi in the morning, play for guard mount, play for the parades if any are held, and for the officers hors or downtown concerts when ordered by their commanding officers. Between times the man practice on their instruments. Icarn solo numbers, study the technique of music and read hier musical journals.

When Coffee Gets You-

The experience will be like that of thousands who have ignored the fact that coffee contains a habit-forming drug, caffeine-about 21/2 grains to the ordinary cup.

Some say, "Coffee don't hurt me," and seem to get on with it for a time. But there are few persons who can use coffee as a routine daily beverage and not sometime feel its effects-headache, nervousness, indigestion, biliousness, sleeplessness, heart trouble, or some other

> Thousands have found relief by stopping coffee and using

## POSTUN

A delicious table beverage made only from whole wheat and a small per cent of molasses, POSTUM contains the nourishment of the grain, including the essential mineral salts (phosphate of potash, etc.). but is positively free from the drug, calfeine, or any other harmful substance.

Postum now comes in two forms:

Regular Postum-must be well boiled-15c and 25c pkgs.

Instant Postum-a soluble form-requires no boiling-30c and

The cost per cup of both kinds is about the same.

There's a mighty army of POSTUM users the number is steadily growing-and

"There's a Reason"

Grocers everywhere sell POSTUM.
